

# The Forgetting Curve

This line graph illustrates the percentage of information retained over time. The x-axis corresponds to time after learning, spanning from 0 days to 1 month. The y-axis corresponds to percent remembered, spanning from 0% to 100%.

The graph consists of four lines to demonstrate how quickly information is forgotten.

## Line 1

Label: No study after class.

Description of line: This line begins at 100% remembered at time 0 and ends at approximately 10% at 1 month.

## Line 2

Label: Review 1: 24 hours after class.

Description of line: This line begins at 100% remembered at time 0 and ends at approximately 25% at 1 month.

### **Line 3**

Label: Review 2: 1 week (or less) after class.

Description of line: This line begins at 100% remembered at time 0 and ends at approximately 50% at 1 month.

### **Line 4**

Label: Review 3: 1 month (or less) after class.

Description: This line begins at 100% remembered at time 0 and ends at approximately 70% at 1 month.

### **Additional Graph Features**

A text box is present above the line labels that reads "Notice how more information is remembered after each review!"
